

## **Suggestions**

### **FUTURE ENHANCEMENTS**

This project aimed at developing an online Education System which can be used in small places, and medium cities firstly and then on a large scale.

It is developed to help students that are not able to decide what to choose as a career. And also we can ask for solutions to our queries. It will show best colleges available in India for a course.

The system enables admin to update, delete or insert college details. And thus helps to update to colleges list time to time, without writing any query and in much easier and faster way, every time he uses just with the GUI.

In the nutshell, it can be summarized that the future scope of the project circles around maintaining information regarding:

- We can add review section in future.
- We can add more advanced features like searching for colleges in a city.
- We will host the platform on online servers to make it accessible worldwide.
- Integrate multiple load balancers to distribute the loads of the system.
- Create the master and slave database structure to reduce the overload of the database queries.
- Implement the backup mechanism for taking the backup of codebase database on regular basis on different servers.

The above mentioned points are the future enhancements that can be made in the project. We have left the options open so that if there is any future requirement in the system, then it is possible to implement them. At last, I would like to thank every person who was involved in the development of the system directly or indirectly. We hope that the project will serve its purpose for which it is develop there by underlining success of progress.

## **CONCLUSION**

It has been a great pleasure for me to work on this exciting and challenging project. This project proved good for me as it provided practical knowledge of not only programming python, Flask, HTML, CSS but also about all handling procedure related with “EducationBug” as an e-Information for the students about different streams . The basic purpose of this website is if any person who is confused about his career can solve his queries by getting information from this website and can ask the admin about the problems and admin can reply him through e-mail. Moreover any kind of student can access it whether he is in school or college. Admin is the main authority who can do addition, deletion, and modification if required. It also provides knowledge about the latest technology used in developing web enabled application and client server technology that will be great demand in future. This will provide better opportunities and guidance in future in developing projects independently
